WORK EXPERIENCE

DevOps Engineer Clover Infotech

05/2023 - Present

Mumbai, India

Client : HDFC BANK

Achievements/Tasks

- Deploy and manage virtual machine instances on Amazon web service (AWS) for hosting applications.
- Utilize AWS for deploying and scaling applications without managing the underlying infrastructure
- Worked on application packaging and orchestration technologies such as Docker and Kubernetes for container deployment, writing YAML files to launch different Kubernetes components like deployments, Replica sets, Pods and services.
- managing infrastructure using code, often leveraging tools like Terraform, Ansible, or CloudFormation to automate provisioning and configuration.
- Work with version control systems like Git to manage code changes and collaborate with other team members on code reviews and merges.
- Implemented load balancers for distributing incoming application traffic across multiple instances to ensure high availability and reliability.

Junior DevOps Engineer / DevOps Associate Hexaware Technologies

08/2021 - 05/2023

Mumbai, India

Achievements/Tasks

- Assist in setting up, configuring, and maintaining continuous integration and continuous deployment (CI/CD) pipelines. Monitor pipeline performance and troubleshoot issues related to builds and deployments.
- Work on automating repetitive tasks and processes to improve efficiency and reduce manual work.
- Participate in incident response and troubleshooting efforts, Develop and maintain scripts for automation using tools such as Bash, Python, or PowerShell.
- Assist in the management and configuration of servers, databases, and other infrastructure components.
